

**Seminole County Mosquito Control
Regular Meeting of the
Advisory Board
Bldg 149 Bush Loop, 5-Points
Sanford, Florida 32773
February 10th, 2011
10:00 AM
MINUTES**

Call to Order

10:10 a.m. by Kelly Deutsch

1) Roll Call / Report

Present:

Kelly Deutsch, SCMC Program Manager

Lynda Reaves, SCMC Program Specialist

Marie Duffy, City of Sanford

Dave Dovan, City of Lake Mary

Mike Insley, City of Altamonte Springs

Steve Spencer, City of Casselberry

Karl Henry, Health Department

Absent:

Bob Langley, City of Longwood

Dave Waller, City of Oviedo (out until 2/14)

Zynka Perez, City of Winter Springs (out until 2/14)

2) Approval of the Agenda

Agenda approved.

3) Approval of the Minutes

Minutes of December 9th, 2010 meeting approved.

4) Old Business

a) Web Site

The website is progressing. There is a Content Management and Systems team meeting regularly to implement a new Seminole County website with integration of GIS so cities can view online. Our IT and GIS departments are getting assistance from vendors for database conflicts.

b) Hiring

Program Specialist position filled by Lynda Reaves.

c) Mosquito Magnet

Purchase of 2 Mosquito Magnets complete. Need propane tanks before implementing in field. Not sure yet if effective with midges too.

d) Meeting Frequency

The next meeting will be on April 14th, 2011. Meetings will resume on a monthly basis thereafter.

5) New Business

- a) **NPDES (National Pollutant Discharge Elimination System Program)**
New requirements for Pesticide General Permit on track for April 2011.
- b) **Hiring**
Seasonal jobs have been posted to Seminole County internet site.
- c) **Evaluation of new GIS system**
Evaluation of GeoPro GIS system by ADAPCO. Software is specific to Mosquito Control needs with all-inclusive reporting functions. Additional information can be found at <http://www.mygeopro.com/AboutGeoPro.aspx>
- d) **Mosquito Season has officially started**
Daily calls from Geneva/Mullet Lake Park area regarding aggressive, large sized, swarms of mosquitoes. Upon inspection, samples identified as *Aedes sollicitans* with a 50+ landing rate per minute. It is unusual for this primarily salt marsh mosquito to be so prevalent in a fresh water area.

6) Discussion

- a) **NPDES**
General Permit is \$500, good for 5 years. Cities can still perform treatments because they are not organized under 388.021 F.S. but Seminole County must be notified of such treatments for tracking purposes and adherence with site limitations of material use.
- b) **Seasonal Hiring**
We are seeking 5 summer positions immediately + 2 additional positions to post later for winter months.

The meeting was adjourned at 10:30 am. Next Regular Meeting: April 14th, 2011 at 10:00 A.M.
